Comments

Life cover is material, but it will likely not be able to replace earnings until retirement age. Other family assets exist that could provide cash flow.

Dean's income protection is currently lower than his earnings, and increasing this should be discussed.

ESTATE PLANNING DETAIL

Estate facts to confirm.

Wills and estate documents

Justine	General	Dean	On file — unsigned

Trusts

TRUST	OWNER	TYPE	TRUSTEES
VDW Family Trust	Household	Inter vivos (living)	—

Estate liquidity

Planner comment: There are sufficient liquid assets to provide for estate liquidity, given that both spouses leave everything to each other. No estate duty or capital gains tax will be payable on the first death.

Comments

Planner comment: Signed documents are needed for both wills, and the estate administration needs to be tidied up.

METHODOLOGY AND IMPORTANT INFORMATION

Notes for interpreting this report.

Purpose of this document

This pre-meeting review document is prepared to support a planning conversation. It highlights factual information, planning assumptions, and agenda items that should be confirmed before recommendations are finalised.

- It is not intended to be a complete record of advice or a standalone recommendation.
- Any agreed changes should be confirmed after the meeting before implementation.

Investment and account information

Account values, asset splits, contribution levels, growth-asset exposure, and offshore exposure are planning inputs used to guide the discussion.

- Values should be checked against the most recent available investment statements.
- Portfolio changes should only be implemented after the agreed advice and instruction process.

Regulatory and confidentiality note

Simple Wealth Pty Ltd is an authorized financial service provider, FSP number 50637. This document is confidential and prepared for the named client family only. It should not be relied on by any other person. Information in this report depends on the accuracy of data provided by the client, product providers, and internal planning records.

Projection methodology

Retirement projections are illustrative and are based on the inputs, assumptions, and capital events recorded at the date prepared.

- Projected income is shown in today's money and before tax unless stated otherwise.
- Actual outcomes may differ because of investment returns, inflation, fees, tax, legislation, contribution changes, and personal circumstances.

Risk and estate information

Policy and estate summaries are factual planning summaries and should be read together with the official policy schedules, beneficiary nominations, wills, and estate-planning documents.

- Benefit amounts, beneficiaries, ownership, waiting periods, executors, guardians, and trustees should be confirmed where relevant.
- Estate, tax, and legal matters may require input from appropriately qualified professionals.
